

## JOB DESCRIPTION - Software Engineer - UI - San Jose

### Description

Kognitos is seeking a talented Senior UI Engineer to join our growing team. The ideal candidate will have 4-8 years of experience building UI components for product-based companies. We are looking for someone who is proficient in UI engineering and has demonstrated experience in creating innovative and visually appealing user interfaces.

### Key Responsibilities:

- Design, propose and develop end-to-end solutions for UI problems
- Work closely with other engineers to ensure that our products meet user needs and design specifications
- Collaborate with the development team to ensure that all UI components are optimized for performance and scalability
- Write clean, well-documented, and maintainable code
- Participate in code reviews and provide constructive feedback to other team members
- Keep up-to-date with the latest trends and technologies in UI development

### Requirements

- Bachelor's degree in Computer Science or a related field
- 4-8 years of experience in UI development for product-based companies
- Proficient in Javascript and its associated frameworks such as React, Angular, or Vue.js
- Experience with HTML5, CSS3, and responsive design principles
- Strong knowledge of cross-browser compatibility, web APIs and accessibility standards
- Familiarity with version control systems such as Git
- Ability to write clean, well-documented, and maintainable code
- Strong problem-solving skills and attention to detail
- Excellent communication and collaboration skills
- A portfolio of previous work demonstrating expertise in UI development

### Benefits and about company

#### What We Offer:

- Competitive salary and benefits package.
- Flexible working hours.
- A dynamic and collaborative work environment.
- Opportunities for professional development and growth.
- An innovative culture that encourages creative thinking and problem solving.

#### About Us:

Kognitos is a cutting-edge automation platform that combines the power of Generative AI and Natural Language Processing (NLP) to provide a conversational and intuitive

experience for business users. As a fully serverless, SaaS automation platform, Kognitos enables users to build, manage, and execute automations in natural language, with the ability to process and understand domain-specific language. Kognitos provides a detailed auditable view of its runs, allowing users to gain insights into why an action happened or what might have gone wrong in case of an exceptional situation. Additionally, Kognitos's conversational exception handling, powered by Generative AI, allows for quick and easy resolution of unexpected system errors or business exceptions.

If you are a passionate UI developer who enjoys building innovative and visually appealing user interfaces, we encourage you to apply for this exciting opportunity.

Kognitos is committed to fostering a diverse work environment and proud to be an equal opportunity employer. As we highly value diversity in our current and future employees, we do not discriminate (including in our hiring and promotion practices) on the basis of race, religion, color, national origin, gender, gender expression, sexual orientation, age, marital status, veteran status, disability status or any other characteristic protected by law.
